

RAVIKUMAR GALINKI

Angular Developer

+91-9441153529 @ galinki.ravi33@gmail.com www.linkedin.com/in/ravi53529 Hyderabad

SUMMARY

I am an experienced Angular Developer with over two years of hands-on experience in building scalable and high-performance web applications. My expertise lies in Angular, TypeScript, and modern JavaScript framework, enabling me to create intuitive and responsive user interfaces. I am dedicated to continuous learning to stay aligned with the latest front-end technologies and trends. My focus is on optimizing performance and delivering robust, user-centric solutions that enhance overall user satisfaction.

EXPERIENCE

Front-End Developer (Angular)

Ahex Technologies

10/2022 - Present Hyderabad

Ahex Technologies is a company focused on delivering high-quality software solutions for various industries

- Developed and maintained high-performance logistics, airline booking, and hotel booking applications using Angular, Angular Material, and PrimeNG
- Collaborated with back-end teams to integrate RESTful APIs for data-driven features like customer and job management, dynamic reporting, and booking workflows
- Built reusable, modular components and improved user interfaces using SCSS, PrimeNG, and Tailwind CSS, enhancing consistency and scalability across projects
- Implemented state management and handled asynchronous actions with RxJS and Signals ensuring responsive, interactive user experiences
- Improved site performance and responsiveness through effective code refactoring, lazy loading, code splitting, and optimization techniques

Web Developer Intern

Infovirtech PVT. LTD

05/2022 - 08/2022 UP

Infovirtech is a technology solutions provider that focuses on developing web and mobile applications

- Developed and managed a dynamic Employee Details Website using HTML, CSS, PHP, and MySQL, enabling seamless CRUD operations for employee data
- Built user-friendly interfaces for admin registration, login, and logout, enhancing the overall accessibility and security of the application
- Integrated back-end database management to support real-time create, read, update, and delete operations for employee information

KEY ACHIEVEMENTS

Bright Beginning Award

Recipient of the Bright Beginning Award for outstanding performance and contributions as a front-end developer at Ahex Technologies

Web Development

Certified Web Development Associate by Nirman Organization in collaboration with Microsoft.

SKILLS

Angular Material	Bootstrap	Prime NG	Prime flex	CSS 3	Git	GitHub	HTML 5	JavaScript	JSON
Postman	REST	SCSS	Tailwind CSS	TypeScript	Visual Studio Code	BitBucket	Angular(15+)	API's	

EDUCATION

M.Tech (Communications and Signal Processing Engineering)

Jawaharlal Nehru Technological University,Kakinda

10/2018 - 04/2021

B.Tech (Electronics and Communications Engineering)

Sri Vasavi Engineering College(Jntuk),Pedatadepalli

08/2013 - 05/2017

PROJECTS

Logistics Platform

📅 05/2024 - Present

Logistics Platform

Technologies: Angular 17, TypeScript, HTML5, SCSS, Tailwind CSS, RxJS, REST APIs, SonarQube

Overview: Played a key role in developing a full-featured logistics platform with separate Angular 17 web apps for Admins and Customers to optimize transportation and shipping operations.

- **Developed entire frontend architecture** using Angular 17, translating complex logistics workflows into intuitive user interfaces.
- Built and integrated **customer management module** (Create, Read, Update, Delete) with real-time validations and user feedback.
- Designed and implemented **job and shipment modules**, including support for drop management, tracking, status updates, and notifications.
- Created **facility management features** for managing origin/destination data and optimizing delivery routes.
- Developed **Quick Quote functionality** to calculate estimated pricing based on customer inputs ,Converted Figma designs into responsive, pixel-perfect web pages.
- Built **Pricing module** for dynamic rate updates and invoice generation and Built Settings and User Management with role-based access control.

Airline Booking Management System

📅 09/2023 - 04/2024

ATC- Airline Booking Management System

Technologies: Angular 16, TypeScript, HTML5, SCSS, Prime NG, Prime flex,RxJS, REST APIs, Bitbucket

Overview: Developed a comprehensive airline booking management system to streamline booking operations, user management, and reporting. Focused on building secure, high-performance frontend features with clean architecture and scalable components using Angular.

- Led the development of a robust airline booking management platform to streamline operations
- Built a full-featured user management system with CRUD functionality
- Designed a flexible reporting module with pagination, filtering, and search, supporting various report types (daily, airline, and PG-wise summaries)
- Implemented secure authentication and authorization for data protection
- Enhanced frontend performance using lazy loading and code minification

Hotel Booking System

📅 06/2023 - 09/2023

Hotel Booking System

Technologies: Angular 15, TypeScript, HTML5, SCSS, Prime NG, Prime flex,RxJS, REST APIs, Git,github

Overview: Developed a user-friendly hotel booking application that allows users to register, browse hotels, apply filters, view details, and complete bookings with integrated payment support. The system also includes secure authentication and a user dashboard for managing personal bookings.

- Developed a full-featured hotel booking application, providing a seamless experience for users to register, log in, and book hotels
- Implemented secure user authentication and registration
- Designed a user-friendly homepage with hotel listings, filtering options, and detailed views
- Developed a smooth booking flow with address input and payment gateway integration
- Integrated a user profile page for managing bookings

Multi-Application Dashboard

📅 04/2023 - 06/2023

Multi-Application Dashboard System

Technologies: Angular 15, TypeScript, HTML5, SCSS, Prime NG, Prime flex,RxJS, REST APIs, Git,github,chart JS

Overview: Built a dynamic, multi-domain dashboard application tailored for healthcare, banking, and solar energy sectors. Focused on delivering interactive data visualizations, responsive UI, and secure, modular architecture using Angular 15 and PrimeNG for high performance and reusability.

- Developed a multi-domain dashboard application using Angular 15, PrimeNG, and PrimeFlex, tailored to healthcare, banking, and solar energy industries
- Created custom dashboards with interactive charts and data visualizations for industry-specific insights
- Ensured responsive design and robust security for a seamless and secure user experience
- Implemented reusable components and modular architecture, optimizing performance with lazy loading and caching

Learning Management System

📅 01/2023 - 04/2023

Learning Management System Application at Ahex Technologies

Technologies: Angular 15, TypeScript, HTML5, SCSS, Prime NG, Prime flex,RxJS, REST APIs, Git,github

Overview: Contributed to the development of a Learning Management System by creating key user interface modules such as About, Chat, Profile, and Footer. Focused on delivering responsive, user-friendly components using Angular with PrimeNG and PrimeFlex, while collaborating closely with the team to ensure smooth integration and optimized performance.

- Worked on a Learning Management System, developing essential modules to enhance user experience and application functionality
- Designed and implemented key modules, including the About page, Chat, Profile, and Footer, ensuring responsive and user-friendly interfaces
- Integrated PrimeNG and PrimeFlex for efficient, component-based UI development
- Collaborated with the team for smooth module integration and optimized performance in chat and profile modules
